Early Cancer Institute Annual Symposium 2024

Call for abstract submissions

The Early Cancer Institute annual symposium will take place on **Tuesday 1st October 2024**. We invite PhD students, postdocs, junior group leaders and other researchers involved in all aspects of early cancer research to submit abstracts to be considered for a lightning talk and/or a poster presentation at the event. The short talks arising from these abstracts are always a highlight of our Symposium Programme and in 2024 we plan to include more of these talks – please do get involved.

Each lightning talk will be 7 minutes in duration followed by a 3-minute Q&A and will form part of the main symposium programme on 1st October. All approved abstracts will be offered a poster position automatically.

Please submit a maximum 250 word abstract on your **unpublished research** in any discipline related to early cancer, including but not restricted to our research pillars of risk prediction, early detection and early interception on themes such as:

- Early cancer biology
- Modelling cancer development and evolution
- New biomarkers and detection technologies
- Public health and the impact of early detection of cancer
- Clinical translation studies

Please include in your abstract:

- Title
- Abstract text (max 250 words)
- Lead investigator name and affiliation(s)
- Other investigator names and affiliation(s).

All abstracts to be emailed to info@earlycancer.cam.ac.uk. The submission deadline is **Sunday 25th August 2024.**
